Professional Summary

Final-year Computer Science Engineering student and full-stack developer with hands-on experience building and deploying production-grade web applications and AI/agentic systems. Proficient in React.js, Node.js, and Python (FastAPI, Flask, Django), with strong command of SQL and NoSQL databases (PostgreSQL, MySQL, MongoDB). Shipped a live GST-compliant billing platform end-to-end and built multiple LangGraph-based agentic AI pipelines involving RAG, vector search, and LLM integration. Seeking a full-stack or AI engineering role where I can contribute production-ready code from day one.

Technical Skills

- **Languages:** Python, Java, JavaScript
- **Frontend:** React.js, HTML, CSS, Tailwind CSS, Responsive UI Design
- **Backend:** Node.js, FastAPI, Flask, Django, REST APIs
- **Databases:** PostgreSQL, MySQL, MongoDB
- **AI / Agentic Systems:** LangGraph, LLM APIs, RAG, Agentic AI, Vector Search (ChromaDB)
- **Tools & DevOps:** Git, GitHub, Docker, Jenkins, CI/CD, VS Code

Experience

Web Development Intern — Unified Mentor *Apr 2026 – Jul 2026*

- Built **SwapWear**, a MERN-stack web application, as the primary deliverable of a three-month internship – implementing responsive UI, frontend functionality, and backend integration.
- Applied React.js, Node.js, Express.js, MongoDB, REST APIs, and Git across the full development lifecycle in a production-oriented workflow.

Projects

NEXORA — AI-Powered Enterprise Operations & Intelligence Platform *2026*
Next.js, Django, FastAPI, PostgreSQL, Redis, MongoDB, Socket.IO **GitHub**

- Built a full-stack enterprise platform for employee, customer, project, task, and support management using Next.js, Django, FastAPI, PostgreSQL, Redis, MongoDB, and Socket.IO.
- Implemented scalable microservices with JWT/RBAC authentication, AI/RAG capabilities, real-time communication, Docker, REST APIs, monitoring, and CI/CD.

AI-Powered Jenkins Pipeline Analyzer & Self-Healing DevOps Agent *2026*
Python, Jenkins, LLM APIs, CI/CD **GitHub**

- Developed an AI agent that analyzes Jenkins CI/CD pipeline logs to automatically identify build failures, errors, and misconfigurations.
- Integrated LLM APIs to generate root cause analysis and apply self-healing fixes autonomously, without manual intervention.

Self-Reflective Corrective RAG Pipeline (Neural Nexus) *2026*
Python, LangGraph, DeepSeek-R1, ChromaDB, Pinecone, FastAPI **GitHub**

- Engineered a corrective RAG system using LangGraph with a stateful 5-node graph – retrieval, relevance grading, web search fallback, generation, and hallucination checking – enabling full self-correction without human intervention.
- Integrated DeepSeek-R1 as a reasoning-based document grader to evaluate context relevance and detect hallucinations, triggering automatic regeneration on failure.

RecruitMind AI — Intelligent Candidate Discovery *2026*
Python, LangGraph, ChromaDB, FastAPI, Streamlit **GitHub**

- Engineered a stateful 6-node LangGraph orchestration pipeline to parse job descriptions, compute 384-dimensional dense embeddings, and semantically match 300+ candidate profiles via ChromaDB.
- Integrated Groq Llama-3.3-70B for automated, data-grounded recruiter summaries, exposed via an async

FastAPI backend and Streamlit UI.

Education

T. John Institute of Technology Bengaluru, India
Bachelor of Engineering in Computer Science, CGPA: 8.7/10.0 *Aug 2023 – Jun 2027*

Govindram Seksaria Science College Belagavi, India
Pre-University Education (Science), 80% *Jun 2021 – May 2023*

Publications

Towards a Connected Campus: AI-Augmented Institutional Management Platform *May 2026*
IJSRED, ISSN: 2581-7175, Vol. 9, Issue 3 – Co-authored and published a peer-reviewed paper.

Certifications

- Microsoft: Azure AI Fundamentals (AI-900), Azure Fundamentals (AZ-900)
- TATA Forage: GenAI Powered Data Analytics Job Simulation
- NPTEL: Cloud Computing, Database Management System, Introduction to Machine Learning
- Outskill: Generative AI Mastermind
- Cisco: Networking Basics
